

Spotlight Award

In recognition of your contribution to AMD, we are pleased to present you with a Spotlight Award.

In recognition of: Ajaya Dahal

Award Message:

AJ, Thank you for your hard work on the Collins Aerospace 3x25 MRMAC case. Comments from the FAE, Tori West: There's a high priority opportunity at Collins Aerospace that ran into a string of issues with their non-standard 3x25 configuration of the MRMAC. I cannot overstate how helpful AJ has been working through those issues. He not only worked through their questions on the IP, but investigated linux driver issues, created key testcases, verified them in hardware and presented the example designs to the customer. He has been a huge asset to AMD in keeping this program on schedule. -Dan
