

# Spotlight Award

In recognition of your contribution to AMD, we are pleased to present you with a Spotlight Award.

In recognition of: Ajaya Dahal

## Award Message:

We received a critical SR from a key US-Based customer who was seeing bizarre behavior when using our QSGMII IP with a unique clocking setup. Working tirelessly with Elizabeth, AJ helped provide countless hardware design spins and hands-on testing which ultimately enabled the WTS Wired and Wireless team to release a workaround to the customer this week. AJ's contributions were critical to the success of this escalation, and he demonstrated a strong ability to work independently and synthesize new information on his own while working alongside subject-matter experts.
